

# Guardrails

# DEFENDER™

Independently certified safety

## Defender™ guardrails

The ideal addition to walkways and platforms, Defender guardrails provide support for workers, preventing falls and avoiding damage to the roof.

Designed and independently tested in our **NATA™-accredited** testing facility, Defender guardrails fully comply with the **National Construction Code, AS 1657, OHS legislation** and **state law**.

Walkways and guardrails are preferred by state workplace safety authorities over most other types of fall prevention, like roof anchors, static lines and harnesses. A Defender guardrail means better risk management.

## Full compliance and real safety

To provide safe and reliable support Defender guardrails are:

- > ISO 9001 **StandardsMark™** Certified
- > **CodeMark™** Approved to NCC (National Construction Code)
- > Tested in our **NATA™** (National Association of Testing Authorities) accredited facility
- > Fully compliant to AS 1657
- > Fully compliant with OHS legislation
- > Strong, reliable and built to last
- > Suited to all popular types of roofs
- > Fitted by Certified **Defender™** Installers
- > Custom built to meet your site requirements
- > Extraordinarily cost-effective

## Defender™ ... independently certified safety

Accredited with **StandardsMark™ certification**, Defender access and safety equipment is designed by engineers, tested in our **NATA™-accredited** facility and installed by factory-trained installers.

Most importantly, every Defender system is individually configured to suit your site and the way your people work. The result is strong, reliable equipment that delivers fully compliant access and true safety.

### Defender Guardrails are designed and tested for optimal performance

- > Manufactured in an independently-accredited ISO 9001 facility for consistently high quality
- > Manufactured from non-corrosive aluminium
- > All steel components hot-dipped galvanised
- > Meet requirements for weight and strength testing
- > Lightweight and highly durable
- > Installation does not require welding or grinding
- > Easily adaptable and extendable
- > Powder coating options
- > Installed with complete safety fittings
- > Installed by Certified *Defender™* Installers
- > Guarantee and warranty included

### AS 1657 Approved

Defender guardrails are independently certified to AS 1657, the Australian Standard for the design, construction and installation of platforms, walkways, staircases and guardrails. This standard underpins Defender's performance.

### ISO 9001 Quality

ISO 9001 is by far the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

### NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best-practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). Defender products are rigorously tested in a NATA-accredited laboratory.

### CodeMark™ – National Construction Code Approved

The CodeMark scheme recognises Defender's compliance with the National Construction Code (formerly the BCA).

### Other **DEFENDER** safety products in the series:

Access Hatches

Cooling Tower Platforms

Landings & Platforms

Roof Anchors

Rung Ladders

Staircases

Static Lines & Rail Systems

Step Type Ladders

Walkways

Internal & Suspended Walkways

*Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.*
